The Mind Body Problem The
The mind–body problem is a debate concerning the relationship between thought and consciousness in the human mind, and the brain as part of the physical body. It is distinct from the question of how mind and body function chemically and physiologically, as that question presupposes an interactionist account of mind–body relations.

The mind-body problem is the problem of understanding what the relation between the mind and body is, or more precisely, whether mental phenomena are a subset of physical phenomena or not.

At the pineal gland, the nerve processes affect the mind, an immaterial spirit, in accordance with Descartes' mind/body dualism. The mind can also affect the pineal gland, thereby directing the processes of the motor nerves. From Descartes (1664). The mind-body problem can be stated as, "What is the basic relationship between the mental and the physical?" For the sake of simplicity, we can state the problem in terms of mental and physical events: "What is the basic relationship between ..."

It's a mystery. That mystery is the mind-body problem. Our mind-body problem is not just a difficulty about how the mind and body are related and how they affect one another. It is also a difficulty about how they can be related and how they can affect one another. Their characteristic properties are very different, like oil and water, which simply won’t mix, given what they are.
